

Orthopedic and Outpatient Surgery Remodel

Kaiser Permanente
Los Angeles, California

API provided full architectural and engineering services for the renovation of the Orthopedic and Outpatient Surgery departments. The project scope encompassed two floors and consisted of operating and recovery rooms, anesthesia and sterilization spaces as well as all required

support functions. The project was constructed in three different phases to accommodate the ongoing operations of the adjacent departments. Pro-active planning and coordination efforts resulted in smooth construction which was completed ahead schedule .
